WORLDWIDE INDEPENDENT

SINCE 1841

Dun & Bradstreet is the world's leading source of business information and insight, enabling companies to Decide with Confidence since 1841. D&B's global commercial database contains more than 330 million business records from over 200 countries and 95 language territories. The database is enhanced by D&B's DUNSRight® Quality Process, which transforms the enormous amount of data collected daily into decision-ready insight. Through the D&B Worldwide Network – an unrivaled alliance of D&B and leading business information providers around the world – customers gain access to the world's largest and highest quality global commercial business information database.

The D&B Rating® turns information into a brief guide of how a business is currently performing. Derived from the D&B Failure Score®, the D&B reflects a company's financial strength and the likelihood of its failing. Such valuation is based on data from the past, and the drawing of conclusions about future success is limited. The Rating Certificate's value is limited to a period of one year after the issuing date.

The D&B D-U-N-S® Number (Data Universal Numbering System) is a nine-digit identification sequence allowing companies to be uniquely identified across the world. Companies can be matched up to parent companies, subsidiaries, headquarter locations and branch operations. This code gives data a new level of transparency.
